

June 7, 2023

Dear Manhasset School Community,

Due to today's poor outdoor air quality as a result of the smoky and particulate-filled air moving south from wildfires in Canada and a recent issue with the air conditioning unit in the Munsey Park auditorium, tonight's Munsey Park concert will be postponed. A new date will be communicated shortly.

In addition, the New York State Department of Environmental Conservation released an Air Quality Advisory for Thursday, June 8, 2023, stating that the air is expected to remain at an unhealthy level. As a result, we will continue to limit all outdoor activities on our school campus tomorrow. Recess and physical education classes will be held inside. All outdoor field trips scheduled for tomorrow will be postponed. The Senior BBQ will also be postponed. At the Secondary School juniors and seniors will not be permitted to leave the campus for lunch.

We are expecting a regular school day tomorrow. The windows of our school buildings will remain closed and our rooftop air handlers were upgraded as part of our COVID-19 response and remain functional.

If conditions require any changes we will communicate with you promptly.

Sincerely,

Dr. Gaurav Passi

Superintendent of Schools
