

MANHASSET SCHOOL DISTRICT – 200 Memorial Place, Manhasset, NY 11030

STANDING NON-PATIENT SPECIFIC ORDER FOR RNs TO ADMINISTER NALOXONE (NARCAN)

Signs of opioid overdose

- Unresponsive/minimally responsive
- Slow breathing (<10 per minute) or not breathing, snoring with gurgling
- Body limp
- Face pale
- Lips and fingertips turn blu(ish) (cyanosis)

What to do for suspected Opioid Overdose

Check

- Assess the person for signs of overdose-not breathing, not responsive, blue nails and skin
- Stimulate the victim-shake, shout, perform sternal rub

Call

- 911/Activate School Emergency Response (including AED)

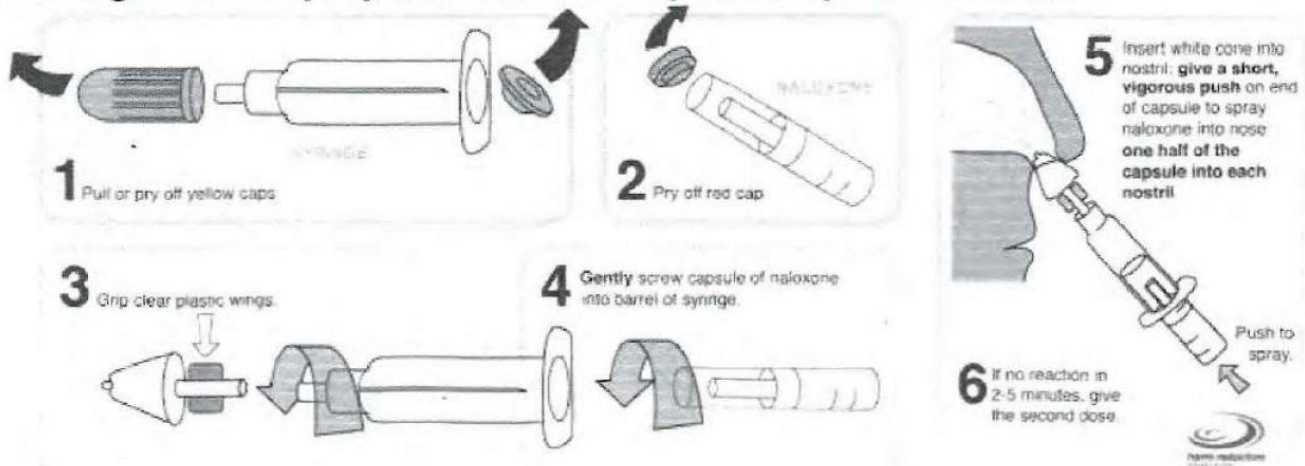

Care

- Simultaneously follow emergency response (CPR/Rescue Breaths) for an unresponsive victim and if suspected overdose **GIVE NALOXONE**
- Roll the person on their side (Recovery Position)
- Monitor and support until EMS arrives

Communicate and Report administration of naloxone

How to give nasal spray naloxone for suspected Opioid Overdose
